

If you want to help your child write their numbers then this following rhyme may help...we use it in school all the time!

Number Formation Patter

0 is where it all begins – curve down around and up again.

Number **1** is like a stick – a straight line down that's very quick.

For number **2** go right around – then make a line across the ground.

Go right around – what will it be, go round again to make a **3**!

Down and across, pencil off and down some more – that's the way to make a **4**.

Go down and around and then you stop – finish **5** with a line at the top.

Make a curve and then a loop – there are no tricks to make a **6**.

Across the sky and down from heaven – that's the way to make a **7**!

Make a 's' and then don't wait – climb up again to make an **8**.

Make a loop and then a line – that's the way to make a **9**!
