

Jasper's Beanstalk

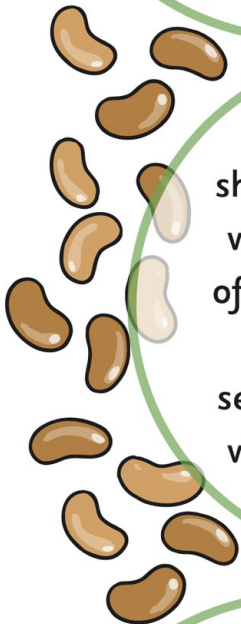

Home Learning Challenge

Create your own beanstalk. How tall can you make it? How many leaves can you add? You could make your beanstalk out of old boxes, bottles and cardboard tubes.

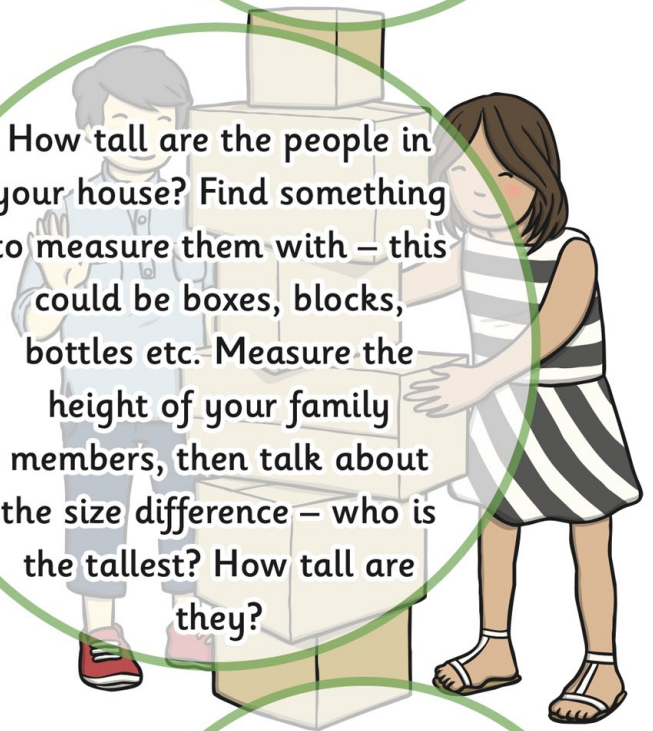

Take a walk around your local area, park or gardens – what can you find growing? You could take a pen and paper to draw what you find.

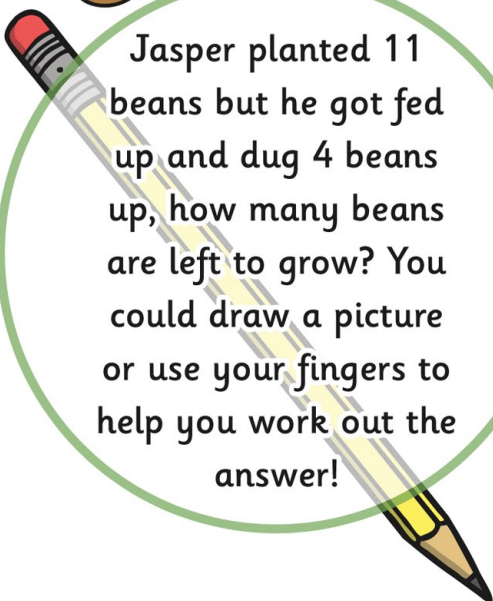

Draw a picture to show what you think would be at the top of Jasper's beanstalk. Write some short sentences to describe what you think you might see.

How tall are the people in your house? Find something to measure them with – this could be boxes, blocks, bottles etc. Measure the height of your family members, then talk about the size difference – who is the tallest? How tall are they?

Jasper planted 11 beans but he got fed up and dug 4 beans up, how many beans are left to grow? You could draw a picture or use your fingers to help you work out the answer!

Keep a diary for a week like Jasper did – this could be about anything. What toys you play with each day? How you get to school? What you eat for breakfast?
