## Week 2 Maths Activities

Addition       4 Rules Calculation practise- Addition         Watch:       https://www.youtube.com/channel/UC- JIXZ7529swCgBIWUVPR_A         There are three Year 4 wideos on addition- <ul> <li>4 digits</li> <li>Expanded to 2dp</li> <li>Compact to 2dp</li> </ul> You can now practise adding with 2, 3 or 4-digit numbers. Make number cards 0-9 and turn them aver.           Option I: Choose number cards, to make two numbers with whole numbers. Write them as an addition like in the video. Solve the calculation as demonstrated in the clip and record your answer. Repeat! Option 2: As above but make numbers with up to 2 decimal places as in the 2- wideo. Option 3: As above but use the compact method modelled in the 3- wideo.          There are some calculations to get you started in an attached document.          Challenge: https://nrich.maths.org/II30 You can extend this challenge by making a 3x3 grid and totalling close to 1000 or a 4x4 grid and totalling close to 10,000.          Times Tables       I have included a document from Twinkl which gives some good ideas for continuing to practice your times tables.		
https://www.youtube.com/channel/UC- JJXZ7S29swCgBIWUVPR_A         There are three Year 4 videos on addition- <ul> <li>4 digits</li> <li>Expanded to 2dp</li> <li>Compact to 2dp</li> </ul> You can now practise adding with 2, 3 or 4-digit numbers. Make number cards 0-9 and turn them over.         Option 1: Choose number cards, to make two numbers with whole numbers. Write them as an addition like in the video. Solve the calculation as demonstrated in the clip and record your answer. Repeat!         Option 2: As above but make numbers with up to 2 decimal places as in the 2- wideo.         Option 3: As above but use the compact method modelled in the 3- video.         There are some calculations to get you started in an attached document.         Challenge: https://nrich.maths.arg/II30 You can extend this challenge by making a 3x3 grid and totalling close to 1000 or a 4x4 grid and totalling close to 10,000.         Times Tables       I have included a document from Twinkl which gives some good ideas for continuing to practice	Addition	4 Rules Calculation practise- Addition
JJX Z7S29.swčgBIWUVPR A         There are three Year 4 videos on addition-         • 4 digits         • Expanded to 2dp         • Compact to 2dp         You can now practise adding with 2, 3 or 4-digit numbers. Make number cards 0-9 and turn them over.         Option 1: Choose number cards, to make two numbers with whole numbers. Write them as an addition like in the video. Solve the calculation as demonstrated in the clip and record your answer. Repeat!         Option 2: As above but make numbers with up to 2 decimal places as in the 2- video.         Option 3: As above but use the compact method modelled in the 3- video.         There are some calculations to get you started in an attached document.         Challenge: https://nrich.maths.org/1130         You can extend this challenge by making a 3x3 grid and totalling close to 10,000.
