

## Science: Life cycles

This term in science we would have been looking at 'Lifecycles' so we'd like you to look at some BBC Bitesize lessons and the associated activities. They can all be found in the Science section on 'Lifecycles and reproduction'.

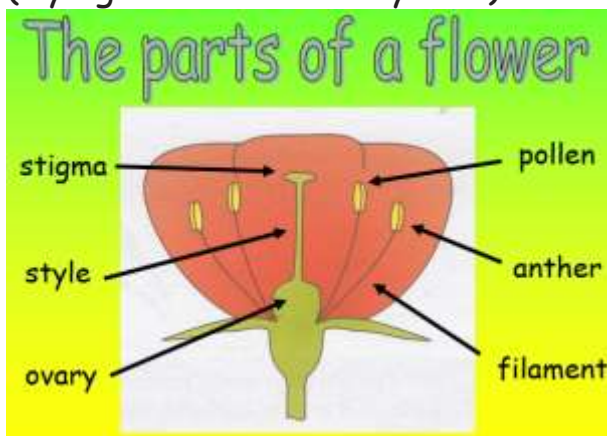

Follow this link:

<https://www.bbc.co.uk/bitesize/topics/zgssgk7>

- What is a life cycle?
- How do animals reproduce?
- How do humans change during their lifetime?
- What are the stages of a plant's life cycle?
- How do flowering plants reproduce?
- How do plants spread their seeds?

Have a go at some of the following:

- Plant some seeds. A simple seed or pip from your fruit should germinate in the correct conditions.
- Draw your own version of the lifecycle of a flowering plant.
- Dissect a flower to find the different parts (Dying lilies work really well)

- 
- Build a bug hotel - use the link below for ideas...
